

Joachim A. Hader

Managing director of secudor GmbH

Dipl. Ing. (FH) Joachim A. Hader, born in 1957, studied communications engineering at the Georg Simon Ohm Fachhochschule in Nuremberg.

He gained his first professional experience over 10 years as head of software development at, that time based in Nuremberg, Eberle GmbH. There he was responsible for the planning and development of programming systems and operating systems for PLC as well as commissioning. Amongst others, he played a leading role in the world's first development of PLCs based on the industrial standard IEC 61131-3.

Over several stations as project manager, executive and internal consultant in different corporations and medium-sized enterprises, e.g. Karstadt Quelle (Arcandor), Media-Saturn and TÜV Süd, he has accumulated comprehensive expertise in the areas of in-, out and rightsourcing, organizational development, software engineering, plant and control technology, data center operations, IT service management, as well as data protection and data security.

Since 2013 he has been the managing director of secudor GmbH. As a certified data protection officer (TÜV), project manager, expert for digital forensics and computer science, he and his team provide advice on companies on all aspects of data protection, information security and cyber risk management (e.g. thread analysis, social engineering).

In addition, Joachim A. Hader is appointed as an external data protection officer and information security officer at several associations and medium-sized enterprises.
